

Press Release

FlagShip is certified as a Microsoft Gold Partner

FlagShip Integration Services combines the smart use of emerging technologies with best business practices to produce high-integrity, integrated solutions for worldwide corporations. This week Microsoft announced that FlagShip will be included in their Gold Partner Program, recognizing their level of expertise in working with Microsoft products.

The Microsoft Gold Certified Partner Program provides a way for customers to identify companies that have proven their commitment and expertise in one or more specialized areas when delivering Microsoft technologies. Microsoft Gold Certified Partners need to meet a higher set of criteria than any partnering organiza-

tion; including enhanced certification and a portfolio of real-world customer references, and are thus identified and classified as the most skilled partners in specific solution areas.

"Our inclusion in the Gold Partner Program marks our commitment to Microsoft, and further identifies FlagShip's incredibly high level of expertise - nobody in Chicago can do what we do" said FlagShip's President Kim Flagstad. "There are many key advantages and benefits that will be enjoyed by our clients now FlagShip is a Microsoft Gold Partner."

For more about the Microsoft Partner Program and why you should only work with the best please go to:-
